CONNECTED VEHICLE INTELLIGENCE HACKATHON

Technical Artifacts
& Submission Guide

FleetGuard ? Real-Time Fleet Intelligence & Cost Optimisation Platform

A reviewer-friendly map to the source code, solution document and supporting evidence.

PRIMARY SOURCE OF TRUTH | The complete source code and project documentation are maintained in the public GitHub repository. Upload the solution PDF and this guide into the Drive folder for direct access.

1. Codebase and repository

GitHub repository: https://github.com/Yashwanth1887/Real-Time-Fleet-Intelligence-Cost-Optimisation-Platform

Repository overview and quick start: https://github.com/Yashwanth1887/Real-Time-Fleet-Intelligence-Cost-Optimisation-Platform/blob/main/README.md

- **Backend services ?** Browse the project folder on GitHub. Open resource
- **Web application ?** Browse the project folder on GitHub. Open resource
- **Telemetry simulator ?** Browse the project folder on GitHub. Open resource
- **Analytics jobs ?** Browse the project folder on GitHub. Open resource
- **Infrastructure configuration ?** Browse the project folder on GitHub. Open resource
- **Automated tests ?** Browse the project folder on GitHub. Open resource

2. Files to include in the Drive folder

File	Purpose	GitHub copy
FleetGuard_Solution_Document.pdf	Completed solution document in the supplied template.	submission/FleetGuard_Solution_Document.pdfView file on GitHub
FleetGuard_Solution_Document.docx	Editable source for the solution document.	submission/FleetGuard_Solution_Document.docxView file on GitHub
fleetguard-dashboard.png	Product screenshot referenced by the	submission/images/fleetguard-dashboard.pngView file on GitHub

	solution document.	

3. Supporting engineering documents

- **Architecture decisions ?** System structure and recorded design trade-offs. Open resource
- **Demo guide and data notes ?** How to run the local demonstration; synthetic-data declaration. Open resource
- **Performance report ?** Bounded local measurements and limits. Open resource
- **Verification report ?** Checks completed and evidence recorded. Open resource
- **Security overview ?** Implemented controls and known gaps. Open resource
- **Failure-testing notes ?** Failure paths checked and not checked. Open resource

4. Recommended Drive folder structure

FleetGuard Hackathon Submission/
??? 00_Technical_Artifacts_Guide.pdf
??? 01_Solution_Document.pdf
??? 01_Solution_Document_Editable.docx
??? 02_Product_Screenshot.png
??? 03_Source_Code_Link.txt

Keep the full codebase in GitHub and put its repository URL in 03_Source_Code_Link.txt. Upload the PDF, editable DOCX and screenshot as actual Drive files so reviewers can open them without navigating a repository.

5. Reviewer notes

All included demonstration data is synthetic. The measured local producer smoke run is not evidence of sustained 100,000 events/sec end-to-end capacity; see the solution and performance documents for exact limits. The demo video has not yet been recorded and must be added before final portal submission.

After uploading, set Drive sharing to the organizers? requested access level and verify the folder link in a signed-out/private browser window.
